Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Claims 11-200 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected group, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 4/25/2005.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-5, 7-10, 21-22, 24-26 are rejected under 35 U.S.C. 102(e) as being anticipated by Noro (US006793527B2).

Noro's device discloses an electrical connector insert, comprising:

at least one housing (40), wherein each housing comprises:

a plurality of openings at 57 to receive at least one connector portion of at least one

component, and a plurality of conductive contacts extending at least partially within said

at least one housing (40), wherein each conductive contact is associated with an

opening, at least one flat wire segment (17), wherein each flat wire segment comprises

a plurality of conductive traces at 12; and a plurality of connection elements (11) to

Art Unit: 2839

connect the plurality of conductive contacts of said housing (40) to the plurality of conductive traces of said at least one flat wire segment; wherein the plurality of conductive contacts of said at least one housing comprises a plurality of at least one of conductive pins at 23 and conductive sockets at 37; wherein said plurality of connection elements comprise wire segments extending from the plurality of conductive contacts to the plurality of conductive traces of said at least one flat wire segment; wherein said plurality of conductive traces comprise at least one connection via, and wherein said plurality of connection elements connect the plurality of conductive contacts of said housing to the at least one connection via of the conductive traces; wherein said plurality of conductive contacts comprise said plurality of connection elements; wherein said at least one housing further comprises a support element 53 or 20A to support at least a portion of said at least one flat wire segment; wherein said at least one housing comprises a plurality of housings at 20 and 35 and wherein the plurality of housings are sized and shaped to cooperate with each other when the plurality of housing are positioned adjacent one another; wherein said at least one housing further comprises at least one wafer defining said plurality of openings at 31

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 6 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Noro (US006793527B2) in view of Lai (US006210229B1).

Noro's device discloses the aforementioned limitations, but fails to disclose the contact soldering features. Lai's device discloses the contacts soldering features (see col. 1, lines 21-42). It would have been obvious to one having ordinary skill in the art at the time the invention was made to solder the contacts end portion or joints such as the one disclosed in Lai's device in order to connection reliability in Noro's device.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jean F. Duverne whose telephone number is (571) 272-2091. The examiner can normally be reached on 9:00-7:30, Monday-Thursday.
